## CORE VALUES

Apply **BEST** practices.

Coach and counsel toward clearly established goals

Highlight successes

Innovate new strategies in teaching

Engage learners in every activity.

Value education

Engineer opportunities for all learners

## About Us

Academic Achievers & Family Services, Inc. (AAFS) is a community-based learning program aimed at providing educational support and guidance to students and families who otherwise would have limited opportunities for achievement in education. The program is strategically located in the Garner, NC area, affording a short reach to the southeast Raleigh and rural areas simultaneously — areas with a demonstrated need for this service type.

AAFS was born to a group of educators at heart who had a focused dual mission to see positive change in public education and positive change in the youth in the area. We target specifically learners in their formative education years, 2-8, but provide a complement to the educational structure of all students, young and old alike. This is more than just tutoring! This is a formal educational program that teaches principles for learning and acclimates families to the academic rigors of the school system as a whole.

Our goal overall is simple. We want to guide learners toward achievement of their greatest potential, leading by example and demonstrating through instruction. Come visit and let us partner with you to help your child **ACHIEVE!**
